

The Places We Hate, The Places We Think Are Great

Australia is great, though Iraq we hate. Mexico
would be great, is the reason we hate, is because

There is no break.

When we go through Washington there is some
squashington. We hate Antarctica because it
smells like bopartica, and it is so coldartica that
we can not stand Antarctica. New York City is a
cool city because there are a lot of cool pools.

That's why we choose to go to the cool state
pools!
